How To Load Any Older Or Newer BlackBerry Operating System With Desktop Software

by

Steven W. Tutty

1. Navigate to C:\Program Files (x86)\Common Files\Research In Motion\AppLoader
2. Delete XML document file
3. click start/search menu and type: %appdata%
4. The “hidden” Roaming folder should appear
5. click on it and go to C:\Users\Caper\AppData\Roaming\Research In Motion\BlackBerry\Loader XML
6. Delete XML document file found in there.
7. Restart desktop software and now you can install older or newer versions of BlackBerry operating system on any device

Note: Check first to see it the desired version is compatible and create a backup just in case before you proceed.
